An Economic Research Service Report

Foreign Agricultural Trade of the United States

FATUS

January/February/March 1997

Final Issue

USDA
NATL AGRIC LIBRARY
1997 AUG 14 4 2:08

Sales Information

This will be the last issue of the *Foreign Agricultural Trade of the United States (FATUS)* as the Economic Research Service is no longer publishing the quarterly issues. The *FATUS* subscription now includes the monthly newsletter, *U.S. Agricultural Trade Update*, and the *FATUS* fiscal and calendar supplements. The *FATUS* supplements are generally available in June of each year. Subscription rates are \$29 domestic \$36.25 foreign. Send check or money order payable to "ERS-NASS" to:

ERS-NASS
341 Victory Drive
Herndon, VA 22070

For faster service or more information, call **1-800-999-6779**.

Prepared by the Trade Analysis Branch, Commercial Agriculture Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators are Joel L. Greene and Mary L. Fant. Ms. Fant also provides word processing and table formatting support. Editorial support is furnished by Martha R. Evans, Publishing and Communications Branch, Information Services Division, Economic Research Service. Data processing support is provided by Kenneth King, Information Technology Services Branch, Information Services Division.

The United States Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, and marital or familial status. (Not all prohibited bases apply to all programs). Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C., 20250, or call 1-800-245-6340 (voice) or 202-720-1127 (TDD). USDA is an equal opportunity employer.

For additional information about ERS publications, databases, and other products, both paper and electronic, visit the **ERS Home Page** on the Internet at <http://www.econ.ag.gov/>

Digest

Agricultural Exports Surpass \$60 Billion (see p. 2)--U.S. agricultural exports were a record \$60.4 billion in 1996, 8 percent higher than in 1995. Strong prices for grains and soybeans boosted bulk exports 12 percent to \$28.1 billion, the highest since 1981. High-value product (HVP) exports rose slower at 5 percent to reach a record \$32.3 billion.

Imports Advance 12 Percent in 1996 (see p. 6)--U.S. agricultural imports reached \$33.6 billion in 1996, up 12 percent from a year earlier. Growing demand for imported vegetables and beverages, tight domestic supplies for fruit juice, cotton, and sugar, and lower world prices for coffee and rubber were major factors affecting agricultural imports for 1996.

California Leading Exporter in Fiscal 1996 (see p. 8)--U.S. agricultural exports reached a record \$59.8 billion in fiscal 1996 because of strong bulk commodity exports. States that produced grains and soybeans showed large gains in the estimated value of exports in fiscal 1996. The top seven States were unchanged from fiscal 1995, with California the leading exporter, followed by Iowa, Illinois, Texas, Nebraska, Kansas, and Minnesota. Indiana, Washington, and North Dakota completed the top ten.

Export Share of U.S. Agricultural Production (see p. 24)--The export share of agricultural production serves as an indicator of the importance of foreign demand for U.S. farm products. It changes over time as growth in foreign and domestic demand varies. In general, the share is rising as population and per capita food expenditures for U.S. farm products grow faster abroad. As the share rises, U.S. farm income becomes more dependent on the foreign market.

Note to Subscribers

This is the last issue of Foreign Agricultural Trade of the United States (FATUS) that the Economic Research Service (ERS) will publish. The FATUS subscription now includes the monthly newsletter, U.S. Agricultural Trade Update, and the FATUS fiscal and calendar supplements. The FATUS supplements are generally available in June of each year.

Monthly export and import data are available electronically on the ERS homepage and the CALL-ERS/NASS electronic bulletin board. The Internet address is <http://www.econ.ag.gov/>. The data files are spreadsheets with the WK1 extension. The files are located under Products and Services-ERS Publications-U.S. Agricultural Trade-U.S. Agricultural Trade Update.

To access the bulletin board, set your communications software to 9600 (or lower) baud, N-8-1, and dial 1-800-821-6229, or 1-202-219-0377. Log on as a new user and follow the instructions. The tables are self-extracting archives which are decompressed by typing the file name at the command prompt.

Agricultural Exports Surpass \$60 Billion

U.S. agricultural exports were a record \$60.4 billion in 1996, 8 percent higher than in 1995. Strong prices for grains and soybeans boosted bulk exports 12 percent to \$28.1 billion, the highest since 1981. High-value product (HVP) exports rose slower at 5 percent to reach a record \$32.3 billion.

Bulk Exports Led Growth in 1996

In 1996, bulk export growth accounted for much of the rise in U.S. agricultural exports. Even though bulk export volume declined 6 percent to 119 million tons, higher grain and soybean prices boosted export value 12 percent to \$28.1 billion. Wheat shipments declined 4 percent to 30.9 million tons, but export value surged 15 percent to \$6.3 billion due to higher prices caused by tight supplies. Likewise, corn exports fell 13 percent to 52.2 million tons as prices raised the export value 15 percent to \$8.4 billion.

Cotton exports declined 26 percent in both volume and value to 1.5 million tons and \$2.7 billion, respectively. Increased global supplies and much lower shipments to South and Southeast Asian markets resulted in reduced U.S. exports in 1996. But exports to Canada and Mexico were a record 64,000 tons and 150,000 tons, respectively, a combined increase of 30 percent.

Unlike grain exports, soybean volume rose 12 percent to a record 25.6 million tons in 1996. Exports to China, Mexico, and Indonesia were especially strong, setting records in 1996. Exports to China soared to a record 1.5 million tons, compared with 199,000 in 1995. Shipments to Mexico jumped 31 percent to 2.6 million tons, and exports to Indonesia soared 171 percent to 735,000 tons. At \$286 per ton, soybean export prices were nearly 21 percent higher than in 1995, boosting total value of soybean shipments 36 percent to a record \$7.3 billion.

HVP Exports Advance for Eleventh Consecutive Year

HVP exports only increased 5 percent in 1996, primarily because of the slowdown in beef exports in the latter half of the year and low horticultural export gains. HVP gains were largely due to increased poultry meat, animal feed, and soybean meal exports.

Rising poultry meat demand contributed the most to HVP exports in 1996. Poultry meat exports jumped 23 percent to a record \$2.5 billion. Export volume

rose 17 percent to nearly 2.4 million tons. Shipments to Russia were a record 937,000 tons, and value rose 50 percent to \$913 million. Exports to all the former Soviet republics exceeded \$1 billion, and accounted for 42 percent of the value of U.S. poultry meat exports. Shipments to Hong Kong gained 4 percent to \$419 million, and Mexico's shipments jumped 27 percent to \$208 million. Exports to Japan and Canada were unchanged from 1995 at \$171 million and \$169 million, respectively. One of the most rapidly expanding markets for poultry meat in 1996 was China, where exports jumped 77 percent to \$60 million. Although the China market only accounts for a small share of U.S. poultry meat exports, direct exports to China have been steadily rising.

Exports of animal feeds and fodders advanced 5 percent to \$2.6 billion in 1996, mainly because of higher prices for corn gluten products. The export value of corn gluten products rose 9 percent to \$945 million, but volume fell 17 percent to 5.8 million tons. The European Union (EU-15) was the leading market for corn gluten products with an 87-percent share of U.S. export volume. Shipments of other feeds, including pet foods, accounted for most of the remaining gain.

Sharply higher prices for soybean meal boosted the value of exports 45 percent to \$1.4 billion, the highest export value since 1988. Higher prices accounted for much of the gain as volume only increased 6 percent to 5.2 million tons. The United States expanded exports to many Latin American and Southeast Asian markets. The United States shipped a record 418,000 tons to China; the first substantial U.S. soybean meal exports to China.

U.S. beef export volume advanced 3 percent to a record 611,000 tons, however, lower export prices dropped export value 8 percent to \$2.4 billion. Abundant beef supplies resulted in lower export prices. During the first half of 1996, U.S. beef exports were advancing at a strong 22-percent pace until an *E. coli* outbreak in Japan depressed import demand for beef. During the last half of 1996, total beef export shipments were 13 percent lower than the latter half of 1995. Most of the decline was to Japan where shipments went from a 29-percent gain during the first 6 months of 1996 to a 21-percent fall during the last 6 months. After double-digit growth the past 4 years, beef shipments to Japan rose just 1 percent to nearly 337,000 tons, and export value dropped 11 percent to \$1.5 billion due to lower prices. Exports also declined to Canada and

South Korea. Mexico was the exception as beef exports rose 90 percent to \$163 million, and volume jumped 100 percent to 59,000 tons.

U.S. pork exports reached a record 306,000 tons valued at a record \$1 billion. Although like beef exports, pork shipments to Japan, (the largest U.S. pork market), slowed in the last half of 1996. Exports reached a record 179,000 tons to Japan and a record \$750 million. Exports to Canada were \$74 million, the highest since 1978.

U.S. horticultural product exports increased nearly 4 percent to about \$9.9 billion, largely due to gains in wine and nut exports. Exports of fruit and vegeta-

bles were unchanged from 1995 mainly because of reduced citrus and fresh vegetable shipments to Japan and lower prices for fresh vegetable exports to Canada. However, wine exports expanded 37 percent to \$302 million, and nut exports rose 15 percent to \$1.6 billion. Wine exports to the EU-15 jumped 54 percent to \$144 million, accounting for most of the gain in wine exports. Exports to Canada also advanced 33 percent to \$67 million. The value of almond exports surpassed \$1 billion, a 30-percent increase over 1995, due to higher almond export prices. Almond volume only advanced 10 percent to 276,000 tons. (*Joel Greene, Trade Analysis Branch, 202-219-0816*).

Table 1--Agricultural, nonagricultural, and total trade balance of exports and imports

Imports Advance 12 Percent in 1996

U.S. agricultural imports reached \$33.6 billion in 1996, up 12 percent from a year earlier. Growing demand for imported vegetables and beverages, tight domestic supplies for fruit juice, cotton, and sugar, and lower world prices for coffee and rubber were major factors affecting agricultural imports for 1996.

Fruit juice imports were up 45 percent in 1996, reaching \$913 million. Increased fruit juice imports were led by orange juice which jumped 73 percent to \$274 million, while volume was up 55 percent to 10.7 million hectoliters. Fourth-quarter 1996 was particularly strong for orange juice imports as domestic stocks dipped below normal. Brazil was the leading source, at \$183 million, supplying 67 percent of total U.S. orange juice imports. Apple juice reached \$357 million, a 28-percent increase over 1995. Volume was up 12 percent while the import unit value for apple juice jumped 14 percent. World prices for apple juice were stronger in 1996 as Germany and Poland experienced shortfalls in production. The U.S. western States that supply most of the juice apples also experienced shortfalls leading to higher imports. For the year, Argentina was the leading source for apple juice, supplying \$101 million, surpassing Germany which supplied \$80 million. Eastern and Western Europe supplied 41 percent of total apple juice imports.

Fresh and frozen vegetable imports continued at a strong pace in 1996, rising 18 percent to reach \$2 billion. Canada and Mexico were the dominant suppliers. Growing U.S. demand and competitive prices largely accounted for the increase. Cucumbers, onions, peppers, cauliflower, and broccoli accounted for \$624 million, an increase of 22 percent over the previous year. Tight domestic supplies drew greater tomato imports, mainly from Mexico, reaching a record \$672 million, an increase of 49 percent.

Beverage imports showed consistent growth throughout 1996 with a 21-percent increase to \$2.9 billion for the year. Growing domestic consumption and a stronger U.S. dollar made foreign beverages more attractive in the domestic market. Wine imports were \$1.4 billion, up 24 percent. Chile and Australia became more important wine suppliers in 1996 with more competitively priced wines over the European Union. Beer imports reached \$1.3 billion, a 12-percent increase. Beer imports from Mexico, increasing 29 percent to \$307 million, gained the most among all suppliers.

Tobacco volume was up 59 percent at 302,000 tons. Price competitiveness in 1996 played an important factor in tobacco imports. The value of tobacco imports in 1996 was up sharply, reaching \$923 million, a 68-percent increase from 1995. In October, tobacco imports soared to 65,000 tons with Turkey supplying nearly 50 percent. For the remainder of the year, tobacco imports dropped to less than 20,000 tons per month. The level of imports in 1996 remained below the pre-1995 tariff-rate quota (TRQ) for tobacco.

Cotton was as equally dramatic as tobacco in 1996. Imports went from 4,000 tons in 1995 to a record 174,000 tons in 1996. However, much of the import activity occurred in the third quarter which accounted for 70 percent of the yearly total. Tight domestic supplies were largely responsible for the change in imports. During this quarter, supplies of cotton moved away from Egypt and Pakistan and towards the Newly Independent States (NIS) and Australia. The NIS supplied 48 percent of the total in 1996. Fourth-quarter cotton imports fell significantly as domestic supplies rebounded.

Sugar imports were up 80 percent in volume, reaching 2.9 million tons. The sugar TRQ increased in accordance with the U.S. GATT commitment. This has allowed for greater imports during times of tight domestic supplies which was the case in 1996.

Beef imports remained nearly the same as a year ago at 708,000 tons. However, the value of beef was down 7 percent because of lower prices. Herd liquidation played a role in the slower import volume. Increased foreign supplies pushed world prices down. The unit import value for beef dropped 7 percent from \$2,046 per ton in 1995 to \$1,894 per ton 1996. Much of the imported beef is supplied by major dairy producing countries that can supply lower grade ground beef from dairy cattle. Canada supplied 33 percent of beef imports with 234,000 tons, while Australia and New Zealand supplied 50 percent with 350,000 tons.

Coffee imports increased slightly, from 989,000 tons to 1.1 million tons, however, the import value dropped 15 percent due to lower world prices. The coffee import unit value dropped from \$3,300 per ton in 1995 to \$2,483 per ton in 1996. U.S. coffee stocks still remain well below normal. Brazilian production has not fully recovered from the 1995 freeze. The U.S. increased coffee imports from Mexico by 30 percent, while imports from Brazil fell 17 percent. World supplies of rubber rebounded,

pushing prices down. The U.S. import unit value for rubber fell 9 percent. Indonesia, Thailand, and Malaysia were the major suppliers. Cocoa imports reached a record 847,000 tons, surpassing the previous record in 1993 of 801,000 tons. The

value of cocoa was up 26 percent, reaching \$1.4 billion, nearly the same as 1978 when cocoa prices were more than double the 1996 level. *(Mark Gehlhar, Trade Analysis Branch, 202-501-8525).*

California Leading Exporter in Fiscal 1996

U.S. agricultural exports reached a record \$59.9 billion in fiscal 1996 because of strong bulk commodities. States that produced grains and soybeans showed large gains in the estimated value of exports in fiscal 1996. The top seven States were unchanged from fiscal 1995, with California the leading exporter, followed by Iowa, Illinois, Texas, Nebraska, Kansas, and Minnesota. Indiana, Washington, and North Dakota completed the top ten.

The top ten leading States accounted for 58 percent of total U.S. agricultural exports, the same as in 1995. A record 21 States exported more than \$1 billion worth of agricultural commodities each. In 1996, the value of wheat and products exports jumped 35 percent to nearly \$7.1 billion, feed grains and products rose 23 percent to \$10.9 billion, and soybean and products increased 10 percent to \$7.9 billion. States, particularly Midwestern States, which are major producers of these commodities, showed the greatest export gains in 1996.

In fiscal 1996, the value of California's estimated exports rose to \$7.3 billion, a 4-percent gain over 1995. California's horticultural exports dominated its export mix, with fruit, vegetable, and tree nut exports totaling \$4.6 billion. This accounted for 63 percent of California's farm exports and was 55 percent of total U.S. fruit, vegetable, and tree nut exports. California was also the leading exporter of seeds at \$157 million, and second in cotton, cottonseed, dairy, and rice.

Estimated exports for Iowa rose 16 percent to nearly \$4.7 billion in fiscal 1996. Iowa was the leading exporter of feed grains and soybeans at \$2 billion and \$1.5 billion, respectively. This was a combined increase of 21 percent. Iowa's exports were also boosted by livestock exports of \$611 million, up 10 percent. Exports from Illinois also rose 16 percent to nearly \$4 billion as its feed grain exports increased to \$1.6 billion and soybeans rose to about \$1.4 billion. Illinois exports of livestock products jumped 70 percent to \$251 million.

Texas was the fourth leading exporter, as estimated exports rose to \$3.6 billion. Texas was the leading cotton exporter at \$760 million, but the estimate was nearly \$120 million less than in 1995 because of lower U.S. cotton exports in 1996. Texas exports advanced because of increased wheat, feed grain, livestock products, and feed and fodder exports.

Nebraska's exports rose to \$3.5 billion, a 10-percent increase. Nebraska led the United States in exports of livestock products at \$834 million, feeds and fodders at \$226 million, and fats and oils at \$119 million.

Estimated exports for Kansas were more than \$3.1 billion. Wheat was the leading export from Kansas, but the value of wheat exports dropped 5 percent to \$860 million as Kansas' share of wheat production dropped compared with fiscal 1995. Kansas was the leading exporter of hides and skins at \$289 million and the second in livestock and products at \$789 million. Minnesota exports exceeded \$3 billion, a 25-percent gain. Exports of Minnesota feed grains jumped 36 percent to nearly \$1.1 billion. Wheat and soybean exports also were strong, rising to \$315 million and \$854 million, respectively.

Indiana moved into the eighth position in fiscal 1996 with exports of about \$2.1 billion, an 18-percent increase. Most of the gain was due to higher wheat (\$129 million), feed grain (\$857.9 million), and soybean (\$715 million) exports. Washington followed at \$2 billion. Fruit and vegetable exports totaled \$496 million and \$424 million, accounting for 45 percent of Washington's exports. Wheat exports reached \$588 million. North Dakota became the tenth leading State with exports of \$1.7 billion. North Dakota was the leading wheat exporter at \$1.2 billion and the leading sunflowerseed exporter at \$124 million.

Of the States not in the top ten, four were leading exporters of five commodity groups. Arkansas was the leading exporter of rice (\$429 million) and poultry and products (\$381 million). Georgia led the United States in peanut exports at \$122 million, North Carolina was the largest tobacco exporter at \$562 million, and Wisconsin was the leading dairy exporter at \$170 million.

Methodology

The Economic Research Service (ERS) estimates export shares based primarily on States' production share of exported commodities. The estimated export value for each State should not be interpreted as actual measurements of States' exports. ERS uses the Bureau of Census merchandise export data which is reported on a free along ship (f.a.s.) basis. The Census export data is reported by customs district and country of destination, but no State of origin is reported in the data set. An agricultural commodity is likely to pass through several States

before being exported, and the State of origin is lost as commodities move from farmgate to port.

The export estimates are based on the National Agricultural Statistics Service's (NASS) crop production and livestock production and slaughter estimates. In some cases, supplemental data such

as the Census of Agriculture, 1992, and the Department of Commerce's estimates for Exports from Manufacturing Establishments: 1990 and 1991, were used to estimate and adjust export shares. The data for previous years was revised to reflect revisions in production data. (*Joel Greene, Trade Analysis Branch, 202-219-0816*).

Table 5--U.S. agricultural exports, by leading States: Estimated value by commodity group, FY 1996

Commodity group	United States	Leading 10 States, by value									
		1	2	3	4	5	6	7	8	9	10
Million dollars											
Total	59,877.6	Cal.	Iowa	Ill.	Tex.	Neb.	Kan.	Minn.	Ind.	Wash.	N.D.
Feed grains and prods.	10,892.9	Iowa	Ill.	Neb.	Minn.	Ind.	Kan.	Ohio	Tex.	Wis.	Mich.
Soybeans and products	7,914.5	Iowa	Ill.	Minn.	Ind.	Ohio	Mo.	Neb.	Ark.	S.D.	Mich.
Wheat and products	7,097.5	N.D.	Kan.	Mont.	Wash.	Minn.	Okla.	S.D.	Colo.	Idaho	Ohio
Live animals and meat	5,588.2	Neb.	Kan.	Tex.	Iowa	Colo.	Ill.	Minn.	Ky.	Cal.	Wis.
Vegetables and preps.	3,775.8	Cal.	Wash.	Idaho	Wis.	Ore.	Mich.	Minn.	Fla.	N.D.	Colo.
Fruit and preps.	3,251.1	Cal.	Fla.	Wash.	Mich.	Ore.	N.Y.	Haw.	Ariz.	Tex.	Penn.
Cotton and linters	3,028.1	Tex.	Cal.	Ga.	Miss.	Ark.	La.	Ariz.	N.C.	Tenn.	Mo.
Poultry and products	2,727.2	Ark.	Ga.	N.C.	Ala.	Miss.	Cal.	Tex.	Va.	Del.	Md.
Hides and skins	1,677.2	Kan.	Neb.	Tex.	Colo.	Iowa	Wis.	Minn.	Ill.	Utah	Cal.
Feeds and fodders	1,674.2	Neb.	Tex.	Kan.	Iowa	Minn.	Fla.	Ill.	Colo.	Cal.	N.D.
Tobacco, unmanufactured	1,392.7	N.C.	Ky.	S.C.	Ga.	Va.	Tenn.	Conn.	Fla.	Penn.	Ohio
Tree nuts	1,372.4	Cal.	Ore.	Ga.	Tex.	Haw.	N.M.	Okla.	La.	Ala.	S.C.
Rice	1,003.9	Ark.	Cal.	La.	Tex.	Miss.	Mo.	na	na	na	na
Dairy products	735.8	Wis.	Cal.	Minn.	Penn.	N.Y.	Idaho	Mo.	Wash.	Tex.	Iowa
Seeds	713.9	Cal.	Iowa	Ill.	Idaho	Minn.	Neb.	Wash.	Fla.	Ind.	N.D.
Animal fats	674.3	Neb.	Kan.	Tex.	Iowa	Colo.	Ill.	Minn.	Wis.	Penn.	Cal.
Peanuts and products	298.3	Ga.	Tex.	Ala.	N.C.	Va.	Okla.	Fla.	N.M.	S.C.	na
Sunflowerseed and oil	279.6	N.D.	S.D.	Minn.	Kan.	Colo.	Neb.	Tex.	na	na	na
Cottonseed and prods.	105.2	Tex.	Cal.	Miss.	Ga.	Ark.	La.	Ariz.	Tenn.	N.C.	Mo.
Other	5,674.7	Cal.	Tex.	Fla.	Ill.	Wash.	La.	Iowa	Ga.	Ore.	Ind.

na = not applicable.

Table 6--State agricultural exports: Estimated value, million dollars, FY 1992-96

	1992	1993	1994	1995	1996
United States	42,614.0	42,869.9	43,949.9	54,715.7	59,877.6

Export Share of U.S. Agricultural Production

The export share of agricultural production serves as an indicator of the importance of foreign demand for U.S. farm products. It changes over time as growth in foreign and domestic demand varies. In general, the share is rising as population and per capita food expenditures for U.S. farm products grow faster abroad. As the share rises, U.S. farm income becomes more dependent on the foreign market.

Background

The calculation of the export share of production is complicated because farm output is sold at various stages of processing. The farm sector is linked in different ways to domestic and foreign markets and to other nonagricultural sectors. Agricultural sales are allocated across various foreign and domestic uses including final household consumption such as fresh apples and oranges and domestic intermediate products such as soybean meal and hides and skins. Farm output is directly sold as primary commodities or indirectly as processed products in the foreign market.

Total agriculture can basically be broken into crops and livestock. The total value of farm sales are shared nearly equally between crop and livestock sectors. Table 8 displays the share of farm sales of crops and livestock from 1988 to 1996. One potential problem in calculating an aggregate export share of agricultural production is double counting of output from one sector that is an input for another agricultural sector. The livestock sector is vertically linked with crops because the sector purchases feed grains from the crops sector. Technically, feed grains sold to livestock would not be considered an output from the agricultural sector but rather an intermediate input within the sector. Thus, feed grain fed to domestic livestock would not be counted as agricultural output in the calculation of total farm output. Estimates from the U.S. input-output table used by ERS, show that the share of feed cost in livestock production is approximately 35 percent. This cost share can change from year to year as the price ratio of feed to livestock fluctuates. But nonetheless, it can be said that on average for every \$100 worth of livestock sold, \$35 worth of feed grain is purchased. Feed grains sold domestically are accounted for in the sale of livestock sold domestically or exported.

There are several processed food and beverage products that are indirectly linked to farm output. Food preparations, fruit juices, wine, and beer are examples and all of which are exported or consumed domestically. In addition, there are nonagricultural products which are derived from primary agriculture. Leather, yarn and thread, tobacco products, organic chemicals, and distilled spirits are examples. While exports of such items represent exports of farm products, they are weakly linked to the farm sector. Although these highly processed items are an important source of income in the general economy, they do not represent a significant share of farm sales. This is because much of the value-added activity occurs outside the farm sector.

For the purpose at hand in measuring the export share of farm production, it is impractical to exhaustively account for all final demands of farm output. Of most importance for making a calculation of the export share of production are primary crops and livestock. Grains, oilseeds, livestock and products, and fresh fruit and vegetables accounted for 75 percent of total agricultural export value in 1996. A large share of this exported value produces a direct flow of cash receipts to the farm sector.

The timing of production and exports present another complication in estimating an export share of production. This is because certain crops are storable and can be exported at some future time. Exports can be drawn from previous production periods. This was common for a number of commodity exports in 1995 and 1996. For example, soybean stocks dropped from 9 million tons in 1994 to 5 million tons in 1995 and subsequently to a near-record low in 1996. Table 9 shows stock levels and stocks as a percent of production for key commodities where stocks play a role in exports. In some cases this share can change dramatically.

The export share should reflect changes in demand rather than fluctuations in current production which is commonly influenced by weather. Thus, adjustments to production are needed. In calculating an export share, current harvested production is adjusted with stock changes to reflect available domestic supply (excluding imports) as opposed to current harvested production previously used by USDA which did not account for changing stocks across time in the calculations. As an example, from table 11 we see that the United States exported 37.7 million tons of wheat in fiscal 1989. If we use the

traditional approach by using production in 1988 of 49.3 million tons, we obtain an export share of production of 76 percent. Wheat stocks (see table 9) decreased by 15.2 million tons between end of year 1987 and end of year 1988 which effectively boosted domestic supply available to foreign and domestic markets. Adding the stock change to 1988's production, we obtained domestic supply of 64.5 million tons. Using this figure as the production base, the revised export share becomes 58 percent. Adjustments to production were made for grains, oilseeds, and almonds.

Exports Share Estimates for 1988-1996

Tables 12 and 13 display the export shares for selected commodities and aggregate shares for crops, livestock, and agriculture. The agricultural export share of production in fiscal 1996 was 21.4 percent, up from the early 1990's and from the previous year. Stronger foreign demand for meat and grains relative to domestic demand largely explains the increase. The export share of meat and livestock rose from 30.4 percent in 1995 to 31.1 percent in 1996, accounting for much of the increase in the share of production. This is in contrast to 1995 when rising grain exports accounted for the rise in the export share of production.

In the past 8 years, one of the most significant changes for individual commodities was the rapid rise in the export share of meats. The share of poultry sales sold to the foreign market rose from 4.3 percent in 1988 to 17 percent in 1996. The export share of beef and pork still remain relatively low but are rising. Rapid growth in foreign meat demand and slower consumption growth in the domestic market has been the key factor in pushing the total agricultural export share higher. Foreign

growth for U.S. meat has indirectly increased demand for feed grains.

Fluctuations in citrus fruit exports have coincided with fluctuations in the export share. The export shares have, however, increased since the late 1980's. The foreign market has become increasingly important for apples. The export share increased fairly steadily from 6 percent in 1988 to over 12 percent currently. Almond production relies heavily on exports. While not a typical year, 97 percent of almond production, adjusted for stock changes, was sold abroad in 1996.

Trends in the export share of production for grain and oilseed crops are not apparent. Domestic feed demand increased since the 1980's, pushing the export share of production down for most feed grains and oilseeds. Because of tight world supplies of feed grains in the world market in 1995 and 1996, the export share rose. The export share for corn remained relatively high in 1995 and 1996, but not nearly as high as in the early 1980's when it was above 30 percent. Similarly, in the early 1980's the export share for soybeans was as high as 45 percent but has remained below 35 percent in recent years. In 1996 and 1995, the export share remained above 35 percent which was not seen since 1988. The export share for sunflowerseed fell from 1988 to 1994 but rose in 1995 and 1996, reflecting stronger foreign demand for oilseeds. Foreign and domestic demand for cotton and tobacco tends to fluctuate from year-to-year, giving no clear trend in the export shares. Cotton production relies more heavily on the foreign market than tobacco production. Generally, the export share for cotton falls in the range of 40-50 percent, while the tobacco share falls in the range of 14-19 percent. *(Mark Gehlhar, Trade Analysis Branch, 202-501-8525).*

Note to Subscribers

Beginning January 1997, the subscriptions for the *U.S. Agricultural Trade Update* and the *Foreign Agricultural Trade of the United States (FATUS)* were combined into one subscription. ERS no longer publishes the quarterly issues of FATUS. The FATUS subscription now includes the monthly *Update* and the *FATUS* fiscal and calendar year supplements.

The monthly *Update* is available on ERS' AutoFAX system. To use this system, call 202-219-1107, using the handset attached to your fax machine, listen for the voice prompts and enter document #16050.

Other methods are available to access *FATUS* data. For additional information, see page 1, note to subscribers.
